FRONTEND DEVELOPER

Nigeria (Remote) | olaide.frontend@gmail.com | +234 814 458 9405 | olaidedev.netlify.app | github.com/olaide13-67

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive, production-ready websites using HTML5, CSS3, and JavaScript. Experienced in business websites, e-commerce interfaces, interactive user experiences, admin dashboards, Firebase-powered applications, and payment-enabled checkout flows. Comfortable taking projects from requirements and UI development through deployment and post-launch updates. Built 7+ live web projects across retail, fashion, hospitality, automotive, and pet-care industries, including a fully functional e-commerce website for a real client. Also developed a personal e-commerce project with a Paystack payment integration.

KEY ACHIEVEMENTS

- Built and deployed 7+ live web projects across retail, fashion, hospitality, automotive, and pet-care industries.
- Delivered a fully functional e-commerce website for a real paying client, including product catalog, product management, admin dashboard, Firebase integration, and WhatsApp customer contact.
- Developed an admin dashboard connected to Cloud Firestore for managing website products and content.
- Implemented Firebase Authentication for secure user and admin authentication.
- Built a personal e-commerce project with a complete cart-to-checkout workflow and Paystack payment gateway integration.
- Built an AI-assisted website builder designed to help small businesses create professional websites from structured business information.

TECHNICAL SKILLS

Languages: HTML5 • CSS3 • JavaScript (ES6+)

Frontend & Styling: Responsive Web Design • Mobile-First Development • CSS Flexbox • CSS Grid • DOM Manipulation • UI Development • Tailwind CSS (Familiar)

Backend & Services: Firebase Authentication • Cloud Firestore • Paystack Integration • Basic API Integration

Tools: Git • GitHub • Netlify • VS Code

Additional: Cross-Browser Compatibility • Website Performance Optimization • Debugging • Problem Solving

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer | 2025 – Present | Remote, Nigeria

- Work directly with small-business clients to understand requirements and translate business goals into responsive, production-ready websites.
- Design and develop custom business and e-commerce websites using HTML5, CSS3, and JavaScript.
- Build interactive interfaces including product catalogs, search functionality, responsive navigation, forms, and WhatsApp customer-contact features.
- Implement Firebase Authentication and Cloud Firestore for authentication, admin dashboards, and dynamic product/content management.
- Develop client-facing admin dashboards that allow website owners to manage products and content.
- Integrate third-party services such as Paystack for payment-enabled e-commerce workflows.
- Deploy websites to Netlify and manage post-launch updates, bug fixes, and feature improvements.
- Optimize websites for mobile devices, different screen sizes, and cross-browser compatibility.

FEATURED PROJECTS
